### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey on December 1<sup>st</sup>, 2009.

The application has been amended as follows:

Claims:

2. (Currently Amended) The system of claim 1,  
wherein the one or more sensors comprise at least ~~one~~ a current sensor and ~~at least one~~ a temperature sensor;  
wherein one of the comparators and one of the accumulators are associated with the current sensor;  
wherein another one the comparators and another one of the accumulators are associated with the temperature sensor;  
wherein the controller is configured to detect an over-current condition[[s]] in the output stage in dependence on the ~~at least one~~ output of the ~~at least one~~ accumulator associated with the ~~at least one~~ current sensor;

wherein the controller is configured to detect an over-temperature condition[[s]] in the output stage in dependence on the ~~at least one~~ output of the ~~at least one~~ accumulator associated with the ~~at least one~~ temperature sensor; and

wherein the programmable response is selected from a group of responses that includes compressing at least a portion of the audio signals without causing a turning off of a transistor of the output stage.

7. (Currently Amended) The system of claim 1, wherein the one or more sensors comprise at least one temperature sensor.

14. (Currently Amended) A method for use with a system including an audio amplifier output ~~stage~~state, the method comprising:

driving the audio amplifier output stage in dependence on received audio signals;  
using a sensor to sense a condition of the audio amplifier output stage, wherein the amplifier output stage includes at least two transistors;

comparing an output of the sensor to a first threshold to produce a binary protection signal indicative of whether the first threshold is exceeded;

incrementing a count when the binary protection signal is a first state;  
decrementing the count when the binary protection signal is a second state;

producing a signal indicative of a potential failure condition when the count exceeds a second threshold;

performing one of a plurality of different programmable responses in dependence on the signal indicative of the potential failure condition, wherein the performed response causes the system to operate in a modified manner without causing a turning off of any of the transistors of the amplifier output stage; and

continuing to operate the system in a modified manner for at least a period of time during which the potential failure condition persists until the count is sufficiently decremented such that the count no longer exceeds the second threshold.

27. (Currently Amended) The system of claim 2, where during the compressing at least a portion of the audio signals:

a portion of the audio signals that is below a compression threshold-value is amplified by a first level; and

a portion of the audio signals that is above the compression threshold is amplified by a second level that is below the first level but is greater than multiplying by zero.

28. (Currently Amended) The system of claim 13, where during the compressing at least a portion of the audio signals:

a portion of the audio signals that is below a compression threshold-value is amplified by a first level; and

Art Unit: 2614

a portion of the audio signals that is above the compression threshold is amplified by a second level that is below the first level but is greater than multiplying by zero.

The following is an examiner's statement of reasons for allowance:

None of the closest prior art, such as Oki (US 2001/0010482 A1), expressly teaches or reasonably suggests controlling an output section in dependence on an accumulator count in a manner as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas J. Suthers whose telephone number is (571)272-0563. The examiner can normally be reached on Monday-Friday 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on 571-272-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
